

SUPPORTING EVERY DETAIL OF YOUR INTAKE SYSTEM

As the largest full-service travelling water screen manufacturer in North America, Atlas-SSI offers the industry's most comprehensive engineering and manufacturing capabilities for new installations, screen rebuilds, replacement parts and on-site service.

Our core values are simple – we emphasize safety and superior customer service. By choosing to partner with Atlas-SSI, you are engaging with a company who has decades of experience, understands the importance of plant uptime and has the capacity to rapidly respond to virtually any water intake system challenge that may arise at your facility.

ONE-STOP SUPPLIER

A single point of accountability for manufacturing, installation, service and replacement parts

ENGINEERING EXPERTISE

Over 50 years of comprehensive water intake system design and engineering experience

FISH-FRIENDLY SCREENS

Preferred partner for new and rebuilt 316(b) screens to protect aquatic life

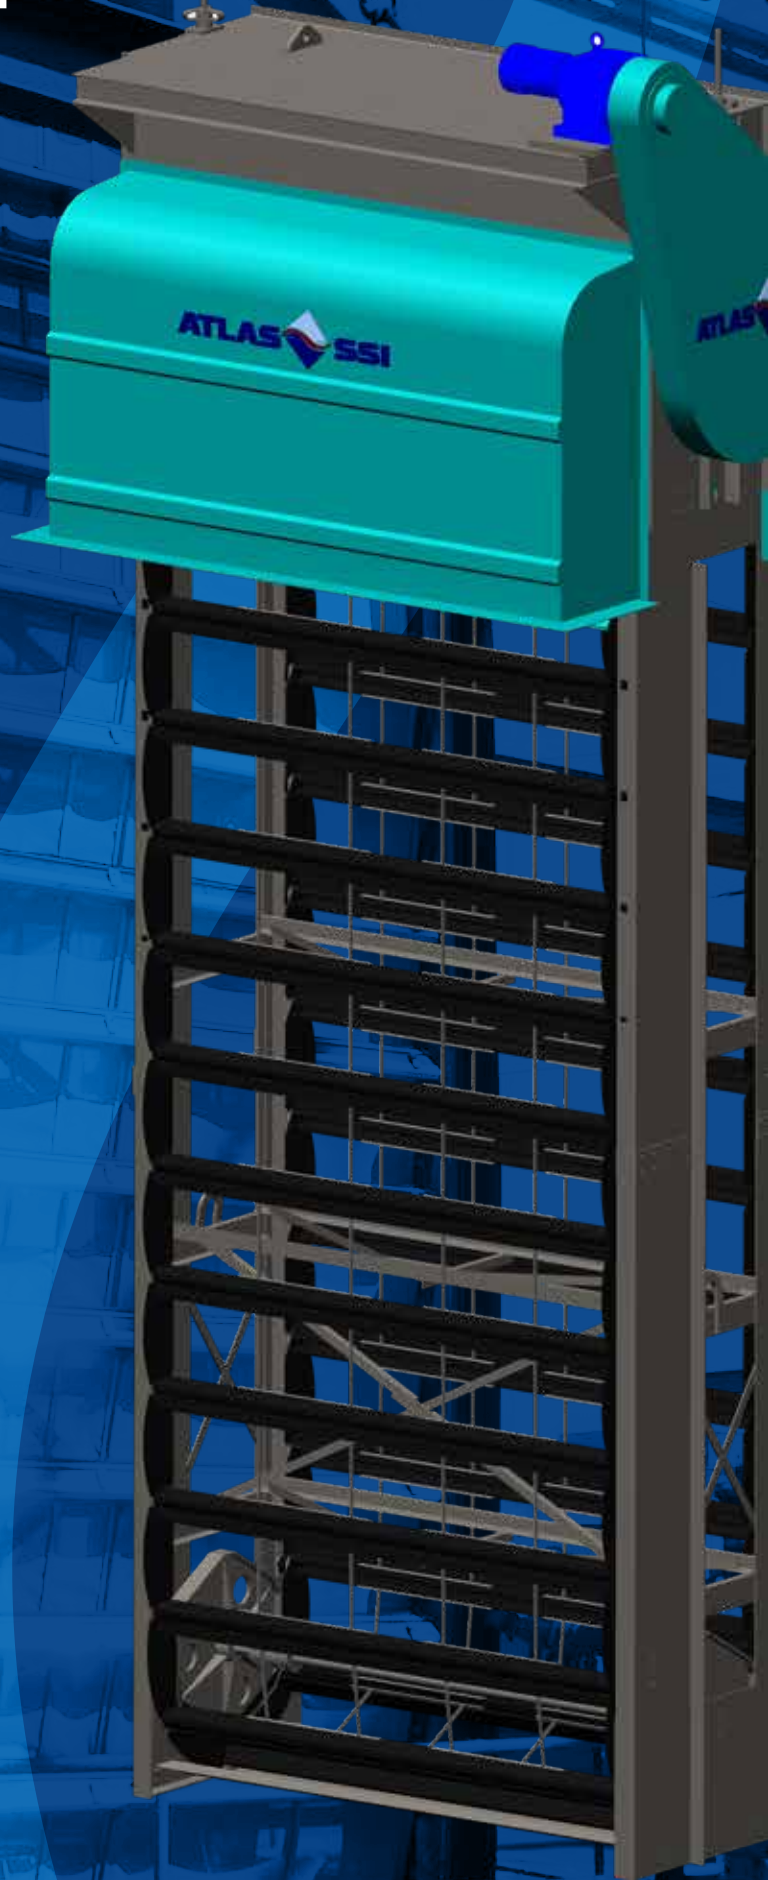

SUPERIOR ON-SITE SERVICE

The largest team of factory-trained technicians and certified commercial divers experienced on virtually every make and model of water intake screens

SMARTSCREEN® TECHNOLOGY

Atlas-SSI water intake systems can be enhanced with SmartScreen® technology features, which use data sensors to remotely monitor site conditions in real time to optimize system performance and to extend the life of your assets. With a user-friendly interface, facility technicians can easily review the event history, run system diagnostic checks and take proactive actions that will save you both time and money.

NEW WATER INTAKE SCREENS

No matter what your facility's water intake needs are – debris removal, fish handling, heavy duty continuous running – we can provide a screen to meet your project demands. Atlas-SSI has been providing reliable and cost-effective dual-flow, thru-flow and stationary raw water intake solutions to power generators, industrial facilities and municipal treatment plants for over 50 years.

ON-SITE SERVICE

Our field crews are staffed by factory-trained screen technicians and certified commercial divers to handle your project needs, including turnkey removal and installation, planned maintenance outage support, on-site repair and inspection above and below the waterline. Safety is our number one priority and all our service crew supervisors are OSHA 30 compliant and abide by all recognized safety regulations.

REBUILT SCREENS AND PARTS

We have the unique capability to rebuild any make or model of screen back to its original specifications using exact replacement parts complete with a new screen warranty to protect your asset. We also manufacture high-quality replacement parts to original specification for any make or model of water screen in-house, saving time and money.
